

Sanjeev Vidyarthi is Associate Professor, Urban Planning and Policy and a senior fellow of the Great Cities Institute at the University of Illinois, Chicago, USA.

Shishir Mathur is Associate Dean (Research) in the College of Social Sciences and a professor in the Urban and Regional Planning Department at San Jose State University, California, USA.

Sandeep K. Agrawal is Professor and inaugural Director of the Urban and Regional Planning Program at the University of Alberta, Canada.

'Sets a wonderful interdisciplinary tone of scholarship that draws on lessons of practice to enrich the understanding of the massive urban transformation process India is trying to channel towards a more egalitarian and environmentally sustainable economic growth trajectory.'

—**Bish Sanyal**, Massachusetts Institute of Technology, Cambridge, USA

'A splendid example of documenting the evolving paradigm of both the theories and practices of India's approach to spatial planning and managing explosive urbanization.'

—**Mohammad Qadeer**, Queen's University, Kingston, Canada

'Makes a sincere attempt to understand and explain the contemporary shift in the approaches in spatial planning and practices that so far have been rooted within the framework of metropolitan-based urbanization.'

—**Amitabh Kundu**, Jawaharlal Nehru University, New Delhi, India

Understanding India's New Approach to Spatial Planning and Development

How is India planning its diverse range of settlements, which vary from rapidly growing cities to remote villages? Have changes in the country's polity influenced its approach to the spatial planning and development of urban and rural areas? Taking the regime change in the early 1990s as a point of departure, this book focuses on the complex nature of India's ongoing urbanization and transformations in the interrelated, but rarely-studied-together, domains of infrastructure finance and development, local planning practice, and on-the-ground empirical outcomes.

Understanding India's New Approach to
Spatial Planning and Development

A Salient Shift?

Sanjeev Vidyarthi
Shishir Mathur
Sandeep Agrawal

Instead of discussing the largest cities—such as Kolkata, Mumbai, and Delhi—that dominate the discourse on urban India, the authors pay close attention to regional cities, rural settlements, and the nuances of the shift away from the Nehruvian planning and development model. This approach illustrates how the tensions between democratic and market-oriented impulses are shaping India's existing and emergent settlements, drawing out useful insights for scholars and practitioners alike.
